To what extent were the environmental and/or social characteristics by this financial product met?

The Strategy promoted environmental and social characteristics by considering Principal Adverse Impacts (PAI) on sustainability factors (**Principal Adverse Impacts**). The Principal Adverse Impacts Indicators are specified in the Principal Adverse Impacts Statement of the Investment Manager (**the Principal Adverse Impact Statement**). This analysis has been conducted prior to every new investment made.

The Strategy promoted social characteristics by avoiding investments in investee companies involved in controversial weapons (**Controversial weapons exclusion**). This has been screened for on a monthly basis.

The Strategy promoted environmental and social characteristics by avoiding investments in companies exceeding a certain level of involvement in, small arms, adult entertainment, alcoholic beverages, gambling, tobacco products, oil & gas, thermal coal, oil sands and shale energy (**Sector exclusions**). This has been screened for on a

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

monthly basis.

There was no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the Strategy (**Reference benchmark**).

● **How did the sustainability indicators perform?**

**Principal Adverse Impacts:** Please see the table in the “How did this financial product consider principal adverse impacts on sustainability factors?” section below.

**Controversial weapons exclusion:** Before an investment was made in an investee company and regularly during the holding period the Strategy has conducted screening of the activities of each investee company to avoid investments in companies involved in controversial weapons. No investee companies involved in controversial weapons were identified via the regular screenings during the holding period.

**Sector exclusions:** Before an investment was made in an investee company and regularly during the holding period the Strategy has conducted screening of the activities of each investee company to avoid investments in companies exceeding a certain level of involvement in specific activities. No investee companies exceeding such level of involvement in specific activities were identified via the regular screenings during the holding period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **...and compared to previous periods?**

The characteristics that are comparable to a previous period are principal adverse impacts, sector exclusions and, controversial weapons exclusion.

Please see the table in the “How did the sustainability indicators perform?” section above for further details.

The sustainability indicators are not subject to an audit statement or other review by a third party, including for historical comparisons.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts were identified, prioritised, and assessed from a materiality perspective relevant to the specific investment strategy of the Strategy. A proprietary analysis tool based on Principal Adverse Impacts Indicators was applied.

In addition, the Strategy has considered principal adverse impacts through active ownership. Where material adverse impacts have been identified in relation to an investee company, such impacts have in some cases formed the basis for an engagement with the investee company.

The principal adverse impacts of an investee company have been integrated into the investment decision-making process along with other factors such as financial and commercial factors and sustainability risks.

The top investments of the Strategy are calculated based on the average of the quarterly values of the Strategy.

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

	2024
#1 Aligned with E/S characteristics	93.73%
#2 Other	6.27%

The investments of the Strategy mainly consist of equities. All equities are used to meet the environmental or social characteristics promoted by the Strategy, in accordance with the binding elements of the investment strategy (#1).

The remaining investments of the Strategy consist of cash held as ancillary liquidity (#2).

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are economic activities** for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## Did this financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

☐ Yes:

☐ In fossil gas

☐ In nuclear energy

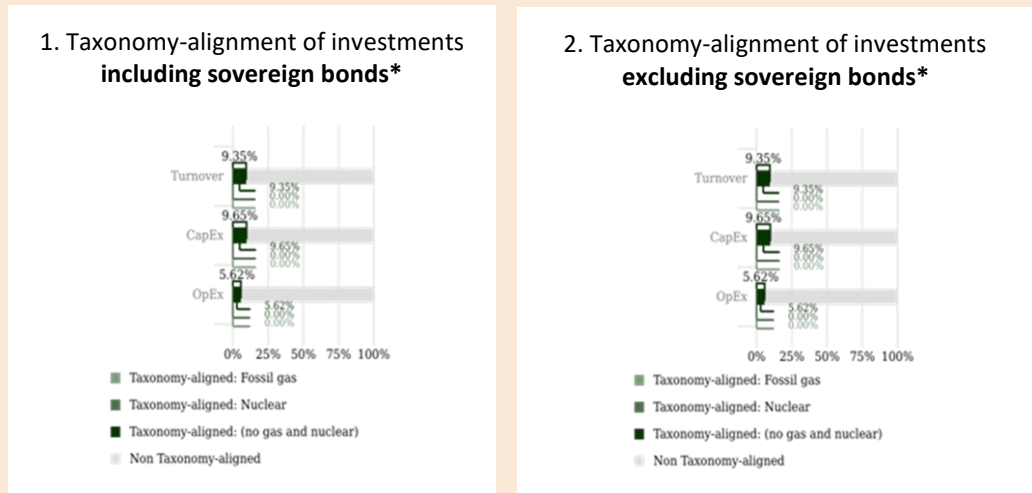

☒ No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective- see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Where data is not available directly from the companies, estimated data is used from a third-party data provider.

Any compliance of the investments with the criteria under Article 3 of the EU Taxonomy has not been subject to an audit statement.

● **What was the share of investments made in transitional and enabling activities?**

1.22% of the portfolio is aligned with the EU Taxonomy through transitional activities and 2.6% is aligned through enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash is held as ancillary liquidity. There are no minimum environmental or social safeguards. Investments under “other” are not used for hedging.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

#### Sector exclusions and controversial weapons

During the reference period screenings were conducted at the time of a new investment and on a regular basis during the holding period to ensure that no investee companies exceeded the level of involvement in the sectors mentioned above. Morningstar Sustainalytics is utilised to conduct these monthly screenings.

#### Principal Adverse Impacts

As for the PAIs all investee companies have been screened regularly – and as a minimum once a year - during the holding period via a proprietary analysis tool. Where material adverse impacts have been identified in relation to an investee company, such impacts may form the basis for an engagement with the investee company.

The Strategy has considered principal adverse impacts on sustainability factors as part of its investment decision process as specified in the PAI statement of the Investment Manager.
